### Outside Impression

The cemetery is in an older section of town and definitely on a side that isn't the most affluent. The cemetery itself is definitely "alive" with activity with many people living who are dedicated to the place. It is well kept, beautifully layed out and amazingly complex with it's layers of history that make it up.

### Walk-in Impression

John Sutter's grave is there on first walk-in and it is a commanding presence. Lots of graves everywhere. One of the largest cemeteries in the area and definitely has a dark-feel to it that seems to lighten up when you walk further in to the cemetery and away from the initial "important people" graves.

### Closing Impression

Haunted. Sensed some impressions of people that seemed to coincide with the EVPs we received. Our evidence is filed at <http://paranormal.ghost-rider-investigations.com/article.php?story=20090830130046109> with links to the key EVPs and library link for all of the EVPs we collected.

<b>Cemetery</b>
Room ID:
Cemetery
<b>Notes</b>
Northern section is much more "active" than the new and more southerly sections. As one closes in on the northern section from the rear of the cemetery, the EVP activity lights up a lot more and it's definitely a mix of nice and not so nice EVPs.
